# Volcanic plume from space

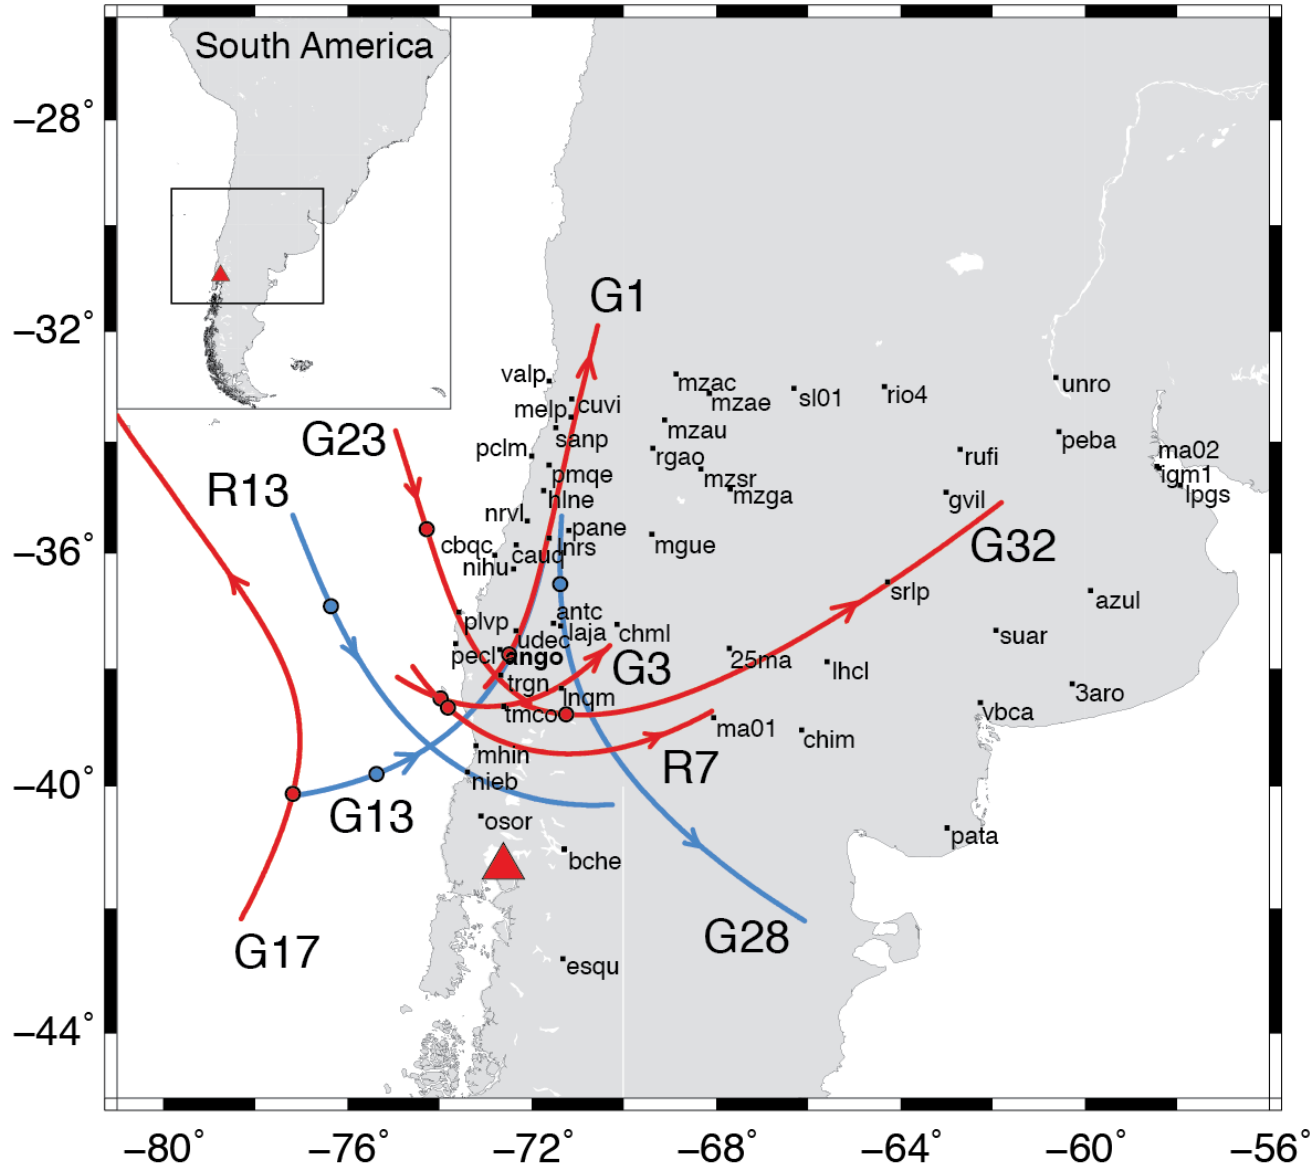

# Mesospheric gravity waves

## 23 April 2015, at 05:09UTC

# Ionospheric response to Calbuco eruptions

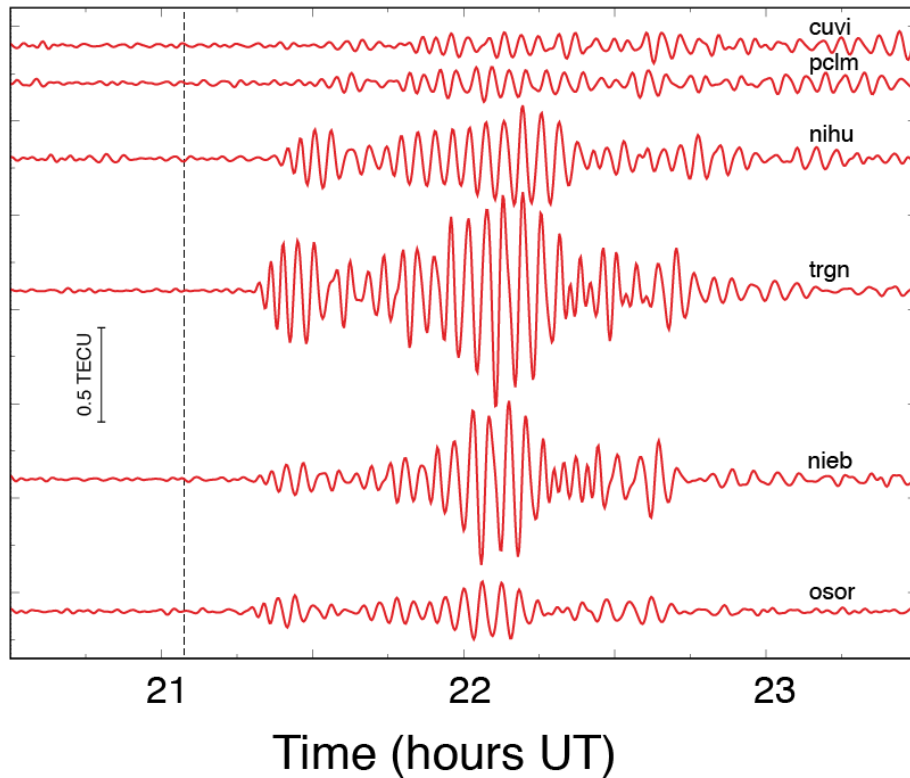

# TEC response to the eruptions

1<sup>st</sup> eruption:

22 April 2015

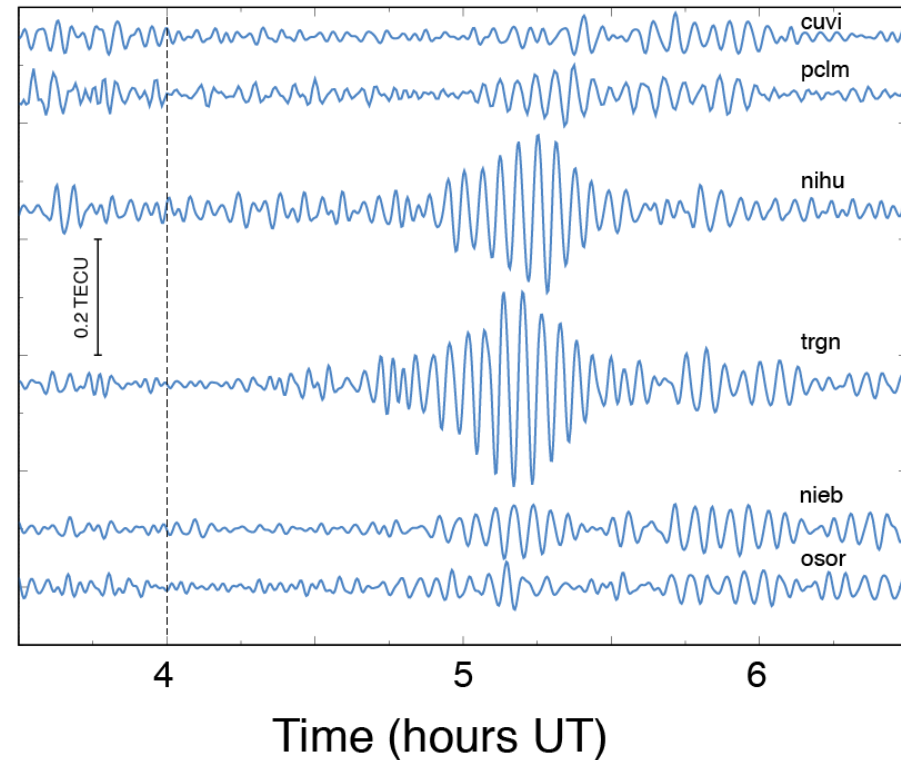

21:04UT (18:04LT)

2<sup>nd</sup> eruption:

23 April 2015

04:00UT (01:00LT)

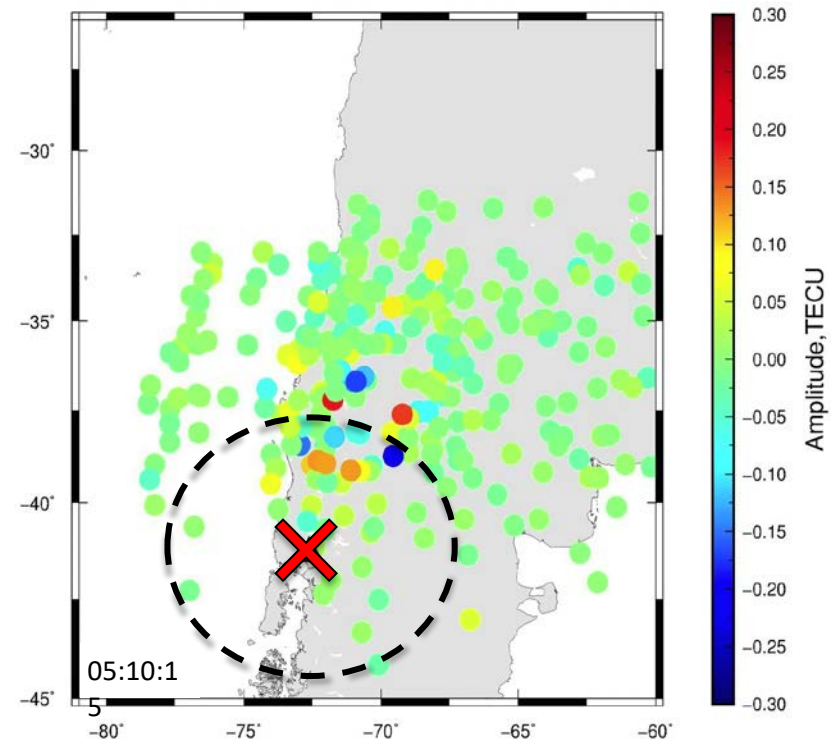

# Calbuco: 2<sup>nd</sup> eruption: 23/04/2015 - 4:00UT

## MESOSPHERE (50-80km):

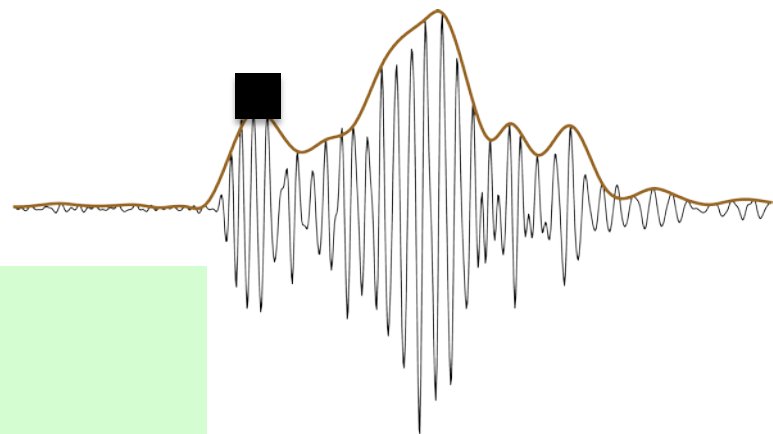

gravity airglow waves

## IONOSPHERE (250-400km):

# Localization of eruption from the ionosphere

- Spherical wave
- Point source
- Constant speed

# «Ionospheric Volcanology» : first results

Calbuco: -41.32; -72.61

**1<sup>st</sup> eruption: 22 April 2015, 21:04UT**

Sat. used	Lat	Lon	UT (hrs)	Hs (km)	Vr (m/s)
ango-G03,chml-G03,plvl-G03	-43.4	-72.7	21.1773	140	500
ango-G03,tmco-G03,chml-G03	-40.6	-73.2	21.3952	140	850
25ma-G17, chml-G03, laja-G03, pecl-G03	-41.2	-72.4	21.2658	140	420
25ma-G17,lnrs-G03,cbqc-G03	-41.8	-73.1	21.2441	140	460

**2<sup>nd</sup> eruption: 23 April 2015, 04:00UT**

Sat. used	Lat	Lon	UT (hrs)	Hs (km)	Vr (m/s)
ango-G13,chml-G13,plvl-G13	-43.5	-70.2	4.94337	300	400
ango-G13, chml-G13, laja-G13, pecl-G13	-39.1	-71.5	5.12943	300	720
25ma-R13, pane-G13, nrvl-G13	-39.1	-71.6	5.05413	300	400
ma01-R13, laja-G13, chml-G13	-42.2	-72.5	5.04021	300	890

# Localisation of eruptions:

... from infrasound observations

... from the ionosphere

P. Bittner et al. (ctbto.org)  
2ème éruption – 400 km away

# Eruption time

$$t_s = t_0 - \frac{\sqrt{(x_0 - x_s)^2 + (y_0 - y_s)^2 + (z_0 - z_s)^2}}{V}$$

## First eruption:

Ts\_seis = 21.07UT

Ts\_infra = 21.17UT (±5min)

Ts\_iono = 21.18 to 21.39UT

## Second eruption:

Ts\_seis = 04.00UT

Ts\_infra = 04.00UT

Ts\_iono = 4.78 to 4.98UT

# SUMMARY

---

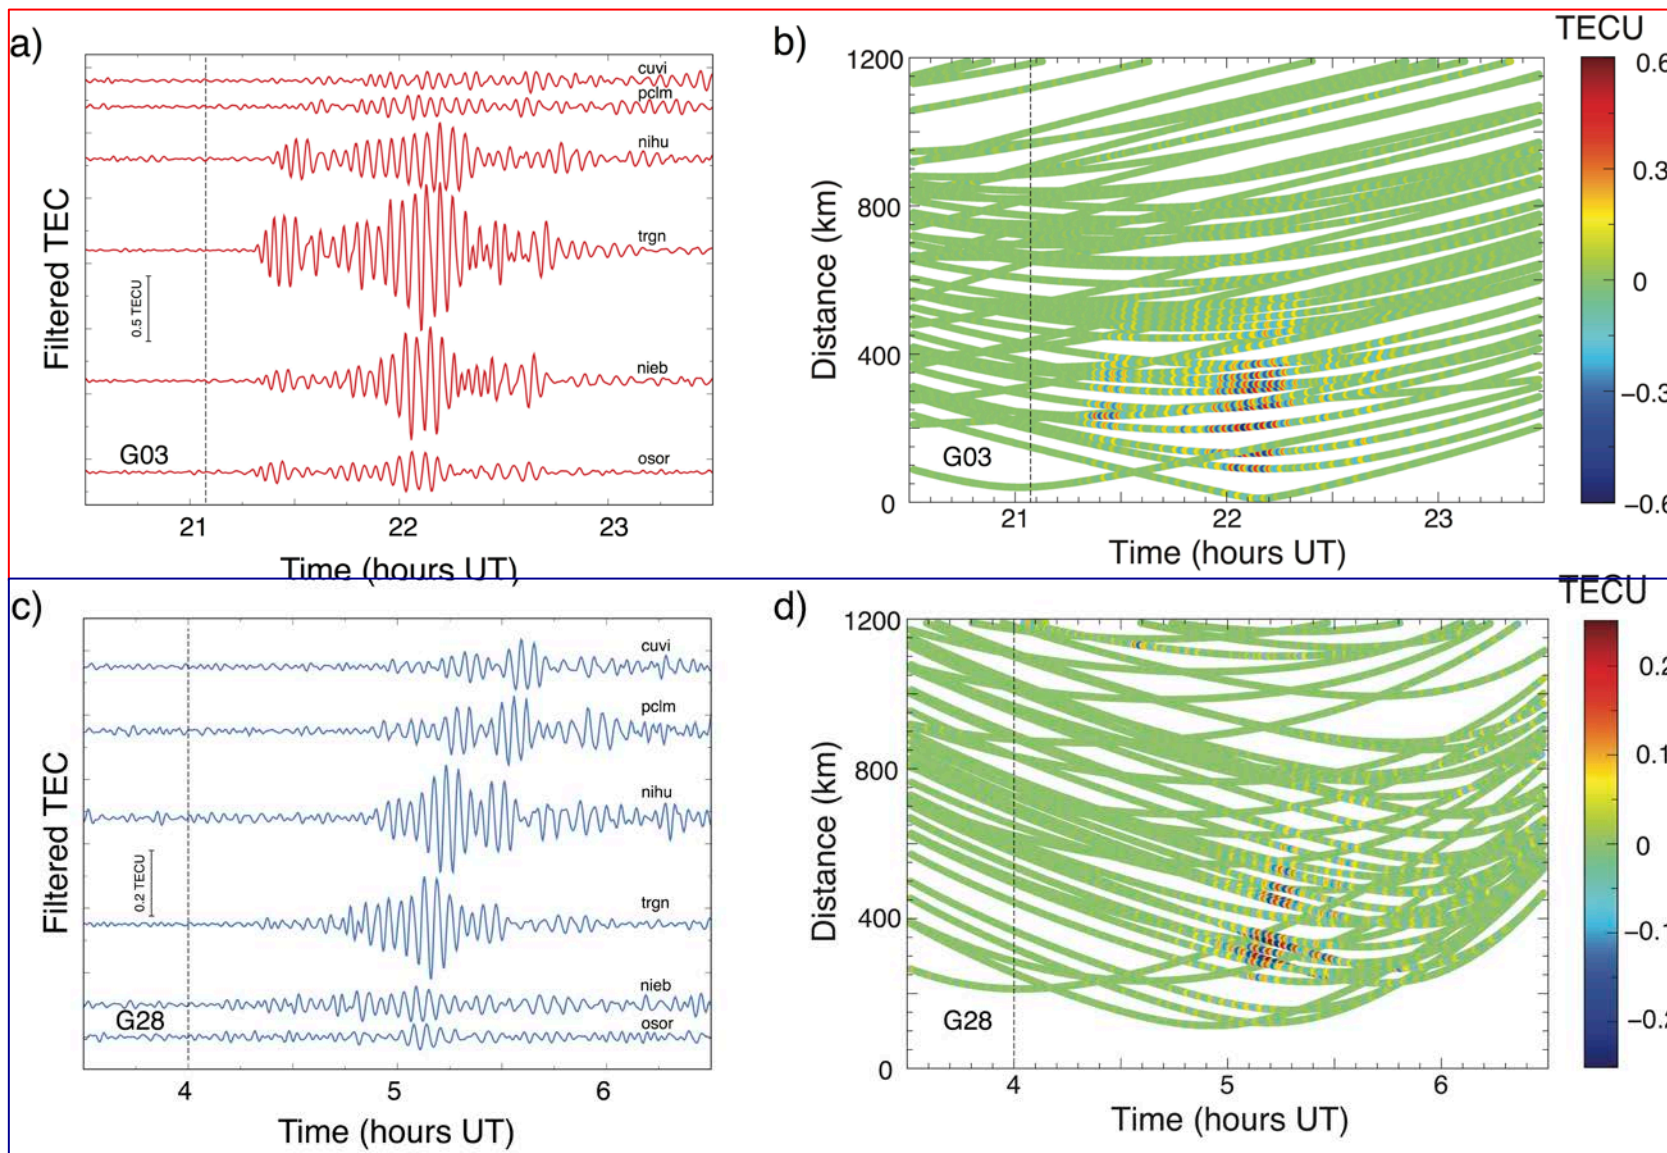

- ☑ **By using data from ground-based GNSS receivers we analyzed the ionospheric TEC response to two eruptions of the Calbuco volcano of 22-23 April 2015;**
- ☑ **Ionospheric GNSS measurements can be used for the detection of eruptive volcanoes. Higher resolution data & other models might/should give better results... 😊**

# Travel-time diagrams

Vh ~900-1200 m/s

## Location of seismic event related to Calbuco activity
